LUXTURE CONCRETE FACADES

The Visual Concrete: "Luxtures Concrete facades" {LCF} is a revolutionary new building material which is applied with a thickness of 3-12 mm and this can be applied to any kind of surface like plastered walls, wood boards, gypsum boards, concrete floors etc. LCF replicates like original concrete which can take on any shape and size. LCF is an effort to put into frame, the ideas of architects and designers to allow the concrete look fascinating and dramatic on walls, ceilings and floors without compromising the rigidity and strength inherent in it. LCF is a modern concept system comprising cement, hardest earthen material, polymers and special additives, modern technology and special tools and workmanship. All this together makes our system a unique methodology to present concrete which is beautiful and with stands against the external weather calamities.
