

# Terracotta Tiles

By Mira Tiles & Stones

**Terracotta floor** is known for its durability and earthy appeal. Terracotta, literally 'cooked earth,' is a ceramic that is manufactured by firing refined clay mixtures at high temperatures in kilns. Terracotta has been in use in a variety of Applications for many centuries.

- **Durability**
- The biggest advantage of terracotta floors is their toughness. These floors can last for ages when they are manufactured and installed in keeping with quality standards. Several ancient sculptures and structures are proof of this long lasting quality of terracotta. Most terracotta flooring is available in earthy shades of red and brown. This reflects the natural colour of the material, which is well liked for its earthiness and beauty. Terracotta flooring provides an old-worldly feel and ambiance to a home.
- **Versatility**
- Terracotta is one of the few materials that are suitable for both indoor and outdoor use. Its strength and beauty have made it useful in several scenarios and settings in architecture. Terracotta flooring provides a rustic look that is hard to imitate. It can be used sealed or unsealed, depending on the application and intended look. When sealed, terracotta is improved further in quality and will hold up to stains, moisture and scratches. Terracotta flooring is available in several shapes, sizes and patterns. You can choose from contemporary designs or traditional ones, depending on the setting and the look you want to achieve.

## Seal

Your terracotta floor must be sealed with a sealant to protect it. Make sure the tile is stripped and clean of all dust and dirt. Just like with the tile stripper, you want to use a foam brush to spread the sealant and to soak up any extra sealant that may pool. Use a fresh clean must put a coat of sealant; let it completely dry according to the directions on the sealer, and then recoat several times until fully sealed. After your terracotta floor is sealed and dried, you may want to consider finishing the floor with a buffer. It really brings the glossiness of your floor out.

# Terracotta Ceiling Tiles

Advantages of clay tile Ceiling , it durability is probably the biggest one. Any roofing material that can last for over 100 years has to be good! Another advantage is that it is available in a variety of shapes, sizes, and colours, unlike regular shingles, adding more character and interest to the appearance of your home. It also has reflective properties, which help to increase the efficiency of heating and cooling systems.
